

About this Report

Reporting Profile

Wienerberger reports once a year on the Group's non-financial indicators. In accordance with past practice, publication of a full Sustainability Report alternates with a concise update presenting the most essential facts and figures. The 2015 Sustainability Update was published in June 2016. The 2017 Sustainability Update will be published in June 2018.

This Sustainability Report covers Wienerberger's activities in 2016. The figures contained in this report also refer to the years 2014 and 2015 to show a three-year trend. The report focuses on the ecological and social aspects of Wienerberger's activities and their impact on society. For more detailed information on Wienerberger's economic performance, its organizational profile and its corporate governance structure, please refer to the 2016 Annual Report (www.annualreportwb.com/en/).

This report covers the fully consolidated subsidiaries of the Group with operations in the wall, roof, façade, ceramic pipe, plastic pipe and concrete paver product groups. A list of all companies covered by the consolidated financial statements is contained in the 2016 Annual Report of Wienerberger. Sustainability reporting follows the scope of consolidation of the Wienerberger Group, but includes Tondach Gleinstätten only from the reporting year 2015. The majority of Tondach Gleinstätten, the leading producer of clay roof tiles in Central and Eastern Europe, was taken over in July 2014 and is now part of the Clay Building Materials Europe (CBME) Division of the Wienerberger Group. As the structures required for the collection of non-financial indicators first had to be integrated in the course of 2014, the indicators and activities of Tondach Gleinstätten are not yet included in

the data for 2014. Deviations from the reporting scope are indicated in the respective sections. Moreover, the data presented in the chapter "Production" only refer to our production sites, whereas all other data include all sites of the Wienerberger Group. For details on the scope of consolidation and the segmentation of the Wienerberger Group, please refer to Wienerberger's Annual Report.

The topics and key indicators presented in the report were elaborated by subject-specific working groups in cooperation with the Corporate Sustainability Officer. The decisions were taken by the Wienerberger Sustainability Steering Committee (SSC).

This Sustainability Report was prepared in accordance with the current G4 guidelines of the Global Reporting Initiative (GRI), "core option".

The data presented in this Sustainability Report are based primarily on internal statistics. Important topics were validated by an independent external auditor. In the year under review, the audit focused on facts and figures regarding occupational safety, health, employee turnover, energy consumption and emissions. The audit also covered the underlying sustainability management system and the processes employed to collect data and to implement the sustainability strategy.
